Nutella Sticks

Peanut Butter

Nut

# Peanut Butter

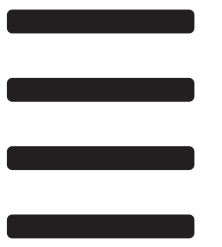

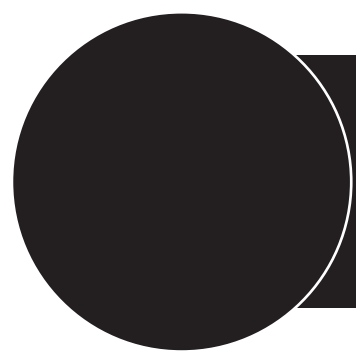

Giving your dog the occasional tablespoon of unsalted peanut butter is a treat you can both enjoy. (Just make sure your brand of peanut butter doesn't contain xylitol.) It's a great source of protein and healthy fats for dogs, and it's a perfect photo opportunity for you.

Also Contained in:

Cookies, ice cream, truffles, muffins, smoothies.

**PETFEED**

Nutella is a popular hazelnut chocolate spread. Some of its ingredients are skimmed milk powder, cocoa, hazelnut, modified palm oil, sugar and soy. You may be wondering if the chocolate content is enough to make Nutella off limits to dogs. Not only does Nutella contain a degree of chocolate but the other ingredients are not well suited for canines either.

## Poisoning Symptoms

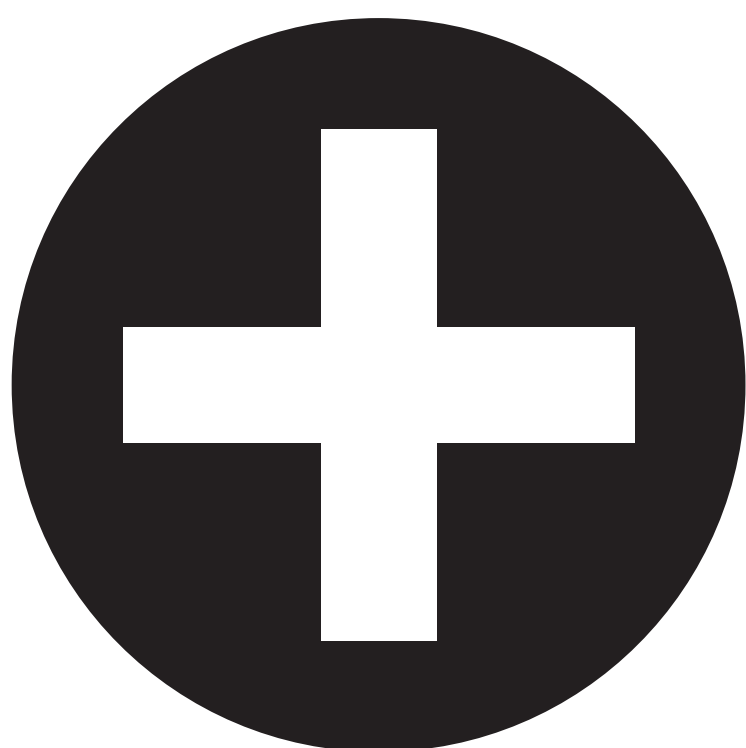

- Diarreha
- Overall weakness
- Seizures
- Inscreased Temperature
- Frequent Urination
- Vomiting
- Increased heart rate
- Muscle Stiffness
- Restlessness

## Also Contained in:

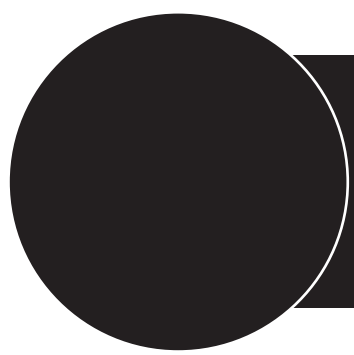

Chocolate spreads, nuts, candybars, granola

## Induce Vomiting

This should only be done if the chocolate was eaten within the last hour and there are no neurological symptoms (tremors) yet. Remember that there can be potentially lethal complications to making your pet

## Instructions

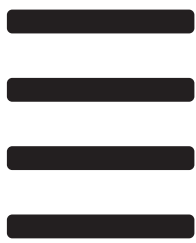

*Give the dog about one teaspoonful of hydrogen peroxide (3%). Combine with water at a ratio of . You are likely to spill a lot if you try to administer it with a spoon, so keep an oral dosing syringe handy in your doggy emergency kit.*
